Outsystems Platform

Everything You Need to Build Enterprise Apps Fast, Right and 4Future.

Agenda

- ❖ Introduction
- ❖ Environment Overview
- ❖ Development
- ❖ UI Customization
- ❖ Merging Code
- ❖ Authentication
- ❖ Authorization
- ❖ Integration (Database & Services)
- ❖ Deployment
- ❖ Monitor & Control
- ❖ The Store
- ❖ The Community
- ❖ Trainings
- ❖ Certificates
- ❖ Pricing
- ❖ Q&A

Outsystems – Introduction

❖ Build applications fast

- Simplify creating specific types of applications
- Integrate with 275+ third-party enterprise systems, DBs, and custom apps
- Pre-built UI templates and patterns
- A repository of reusable components and connectors.
- AI-assisted development

❖ Build applications right

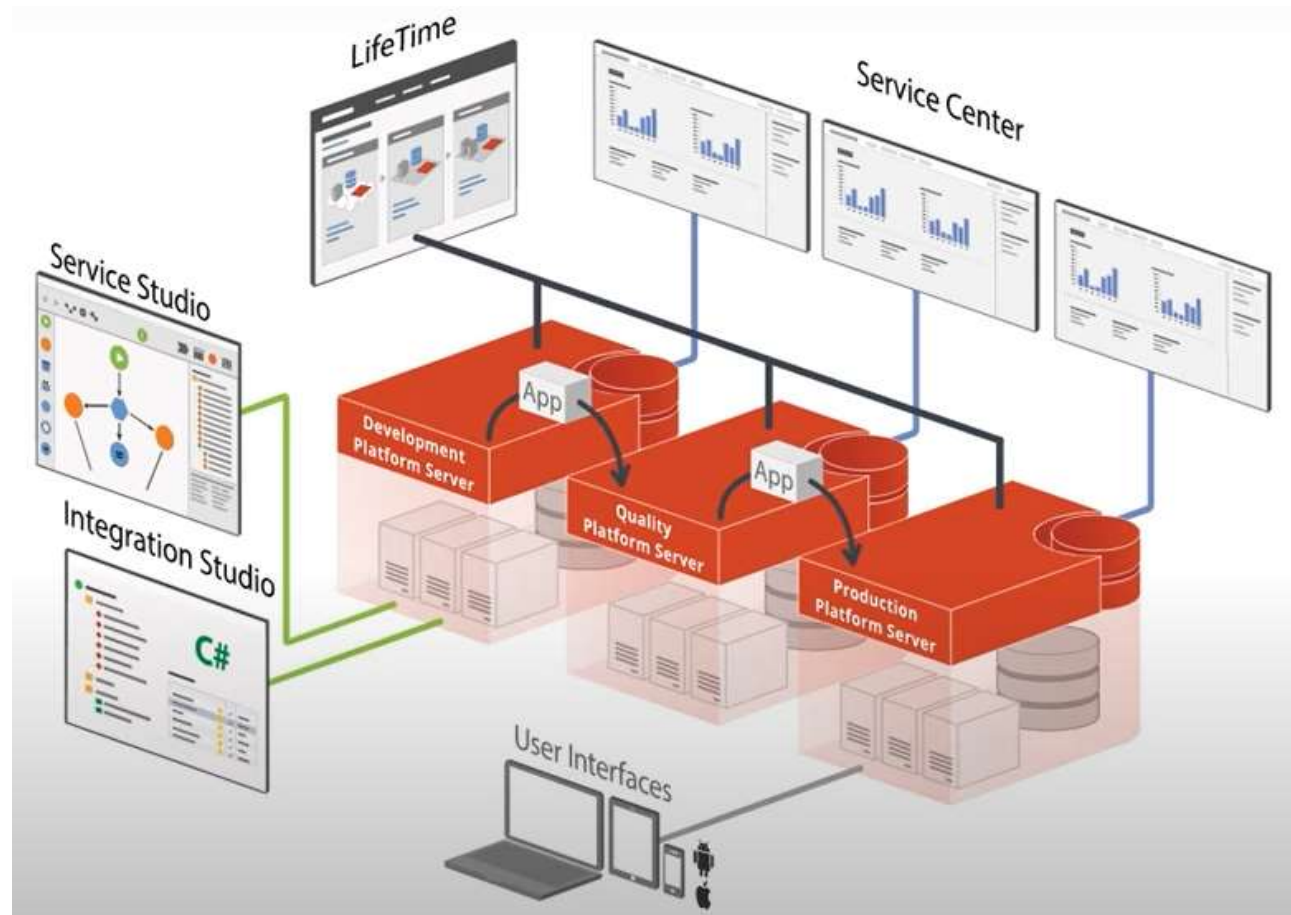

- Application services ensure applications perform as needed.
- 200 security checks are performed from design to runtime.
- AI finds and solves issues, eliminating design errors, effort duplication early.
- Real-time application performance data helps identify anything that needs to be corrected or optimized

❖ Build applications for the future

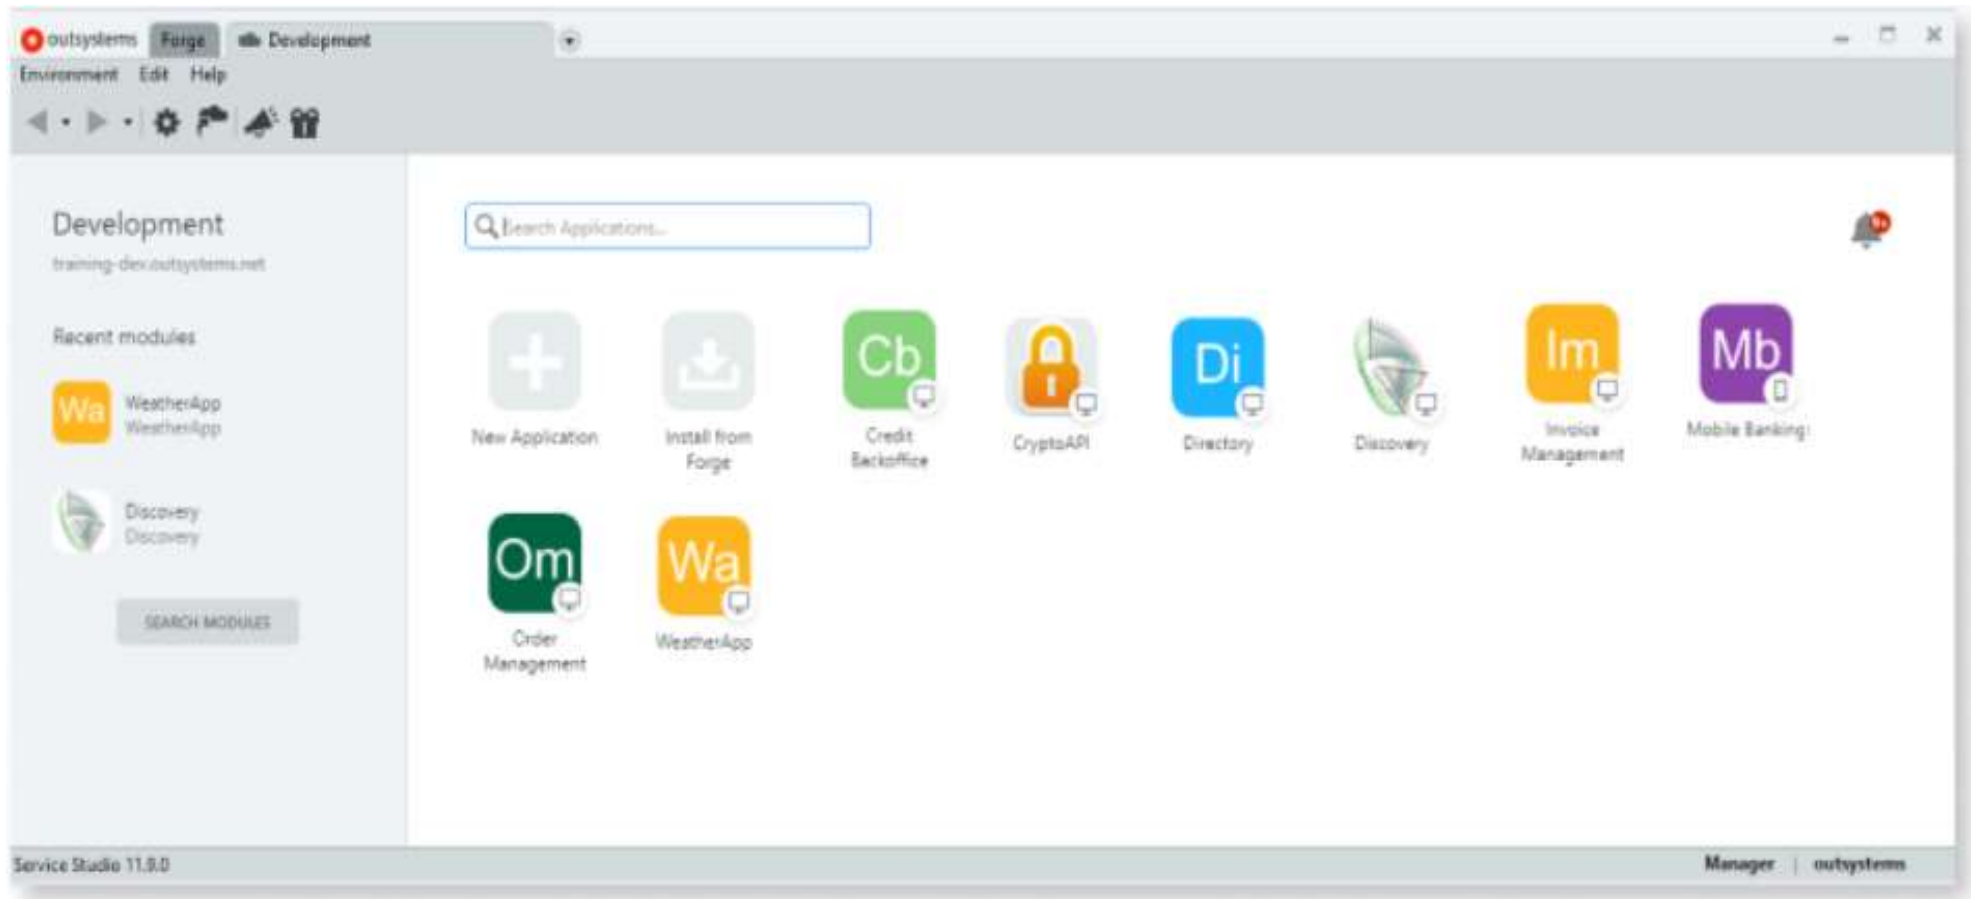

- Platform services, AI, and visual tools enable the continuous introduction of features and capabilities so developers can build applications that evolve quickly as business changes and technologies are introduced

Outsystems – Environment

- ❖ **Platform Server**
 - Compiles, Deploys, Manages, Runs, Monitors
- ❖ **Service Studio**
 - Visual Design and Development
- ❖ **Integration Studio**
 - Integration with external systems (.NET, Database)
- ❖ **Service Center**
 - Manage the Servers
- ❖ **Lifetime**
 - Manage applications life cycle

Outsystems – Development

Outsystems – Development (Cont.)

The screenshot displays the OutSystems Development environment interface. The top navigation bar includes the 'outsystems' logo, 'Forge', and 'Development' tabs. Below the navigation bar, the 'Applications in Development' section shows the 'Invoice Management' application with an orange 'Im' icon. A red line points from the 'App details' label to this section. Below the application name, there are buttons for 'EDIT', 'DELETE', 'DOWNLOAD', and 'OPEN IN BROWSER'. A red line points from the 'App Tabs' label to the 'Develop' tab. The 'Modules' section, indicated by a red line from the 'App Modules' label, shows a list of modules with 'InvoiceManagement' selected. Below the modules list is an 'ADD MODULE' button. The 'Dependencies' section shows a list of dependencies, including 'OutSystems Charts Web', 'OutSystems UI Web', and an 'Add Dependency' button. A red line points from the 'App Dependencies' label to the 'OutSystems UI Web' dependency. The bottom status bar shows 'Service Studio 11.9.0' and 'Manager | outsystems'.

Status bar

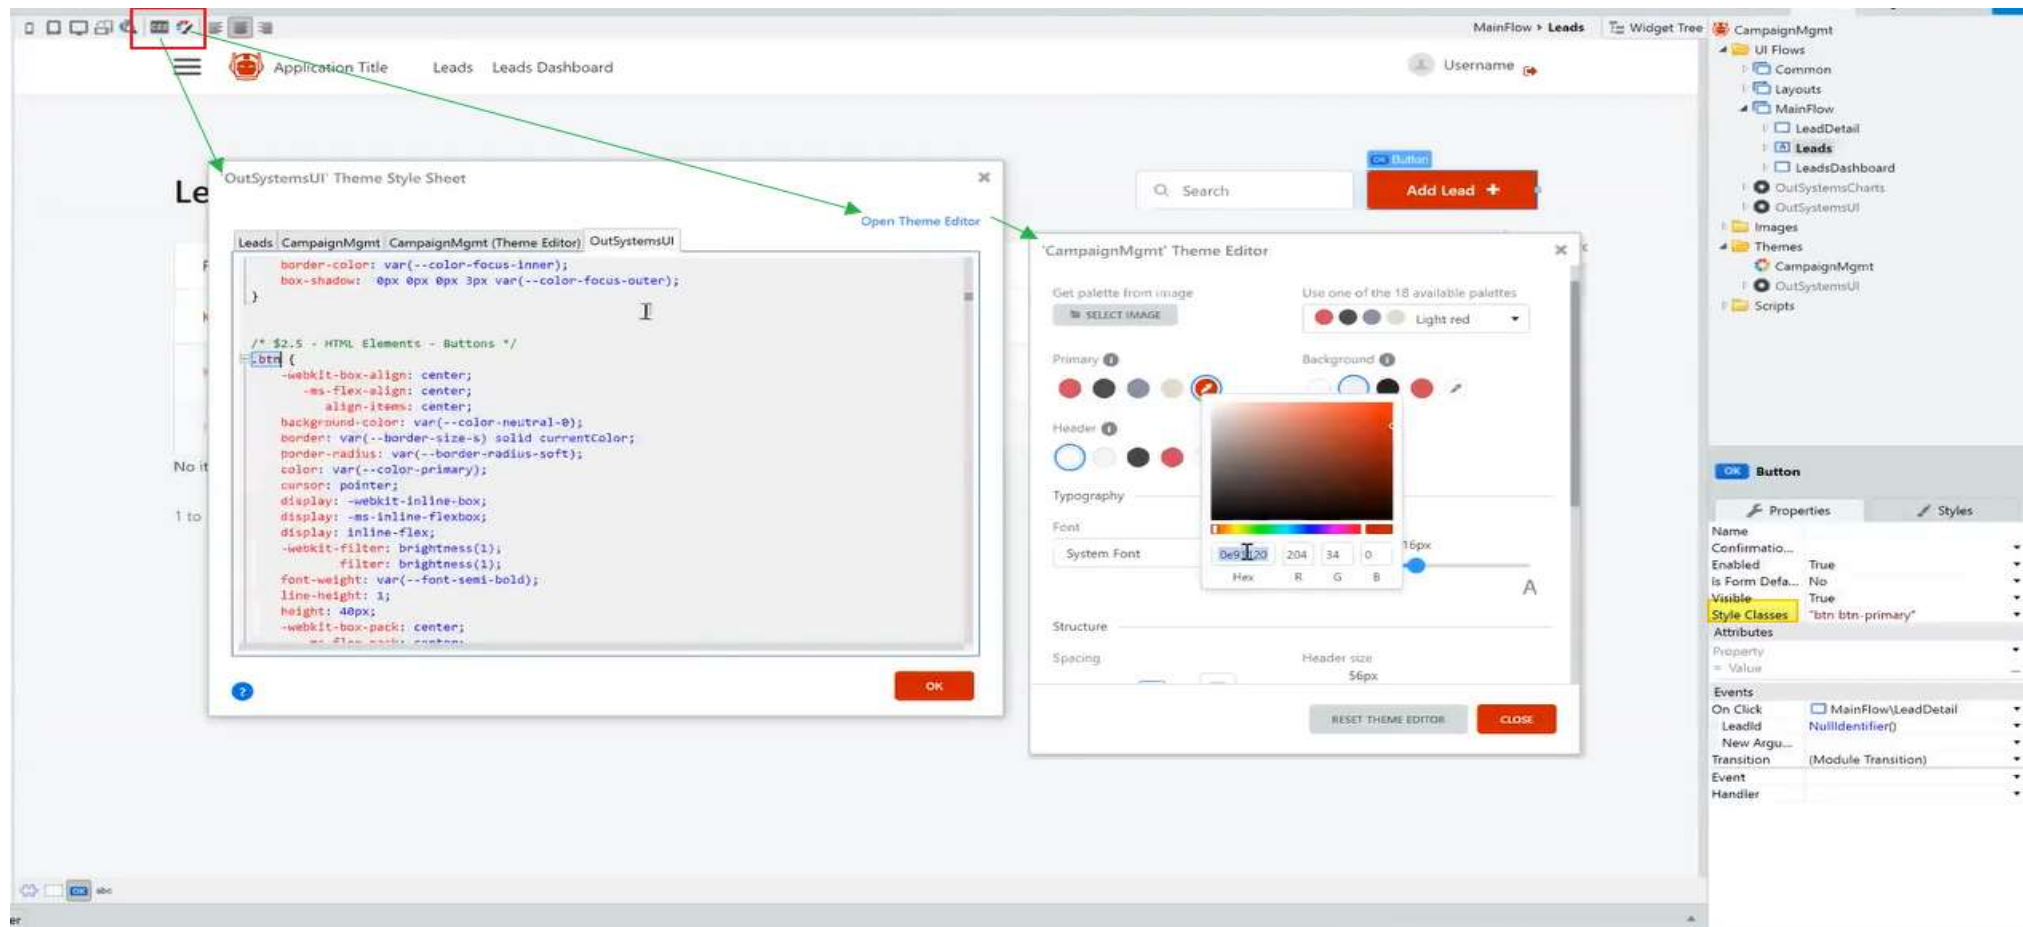

The screenshot shows the OutSystems development environment for a project named 'WeatherApp'. The interface is divided into several sections:

- Toolbar:** Located at the top, it contains various icons for development actions. A red box highlights the '1-Click Publish' button, which is labeled '1'.
- Toolbox:** Located on the left, it contains a search bar and a list of development components such as 'Start', 'Run Server Action', 'Aggregate', 'SQL', 'If', 'Switch', 'For Each', 'Assign', 'Record List', and 'Excel To Record List'.
- Development tabs:** Located at the bottom left, they include 'InvisioChange', 'Debugger', and '1-Click Publish'. The '1-Click Publish' tab is active, showing a progress bar and a list of steps: 'Uploading', 'Compiling', 'Deploying', and 'Done'. The 'Uploading' step is currently selected.
- App layer tabs:** Located on the right, they include 'Processes', 'Interface', 'Logic', and 'Data'. The 'Logic' tab is active, showing a tree view of the application's logic components, including 'Server Actions', 'Integrations', and 'Roles'.
- Properties editor:** Located on the right, it displays the properties of the selected 'GetWeather' Server Action. The properties include 'Name', 'Description', 'Public', 'Function', 'Icon', and 'Advanced'. The 'Advanced' section is expanded, showing 'Cache in Minutes'.
- Status bar:** Located at the bottom, it displays the current user 'Manager' and the organization 'outsystems'.

Outsystems – Integration (DBs)

Outsystems – Integration (Services)

The screenshot displays the OutSystems Integration Builder interface. The left sidebar shows a tree view of the project structure, including 'Service Actions', 'Integrations', 'Integration Builder', 'SOAP', 'REST', 'Asis_services', and 'GetDeterminationResults'. The 'GetDeterminationResults' action is selected, and its configuration is shown in the main pane. The configuration includes a table with the following details:

Property	Value
Name	GetDeterminationResults
Description	Get Determination Results of Acquisition Type account/investment on ASIS (Regis ...
URL Path	/determination-results/?decision-result={scopeDecision}&date-from={fromDate}&date-to={toDate}
HTTP Method	GET
Request Format	JSON
Response Format	JSON
Timeout in Seconds	30
More...	...

Below the table, the creation and modification history is shown:

Outsystems – Monitor & Control

The screenshot displays the OutSystems Service Center interface. At the top, there's a navigation bar with 'outsystems · Service Center' and tabs for 'Factory', 'Monitoring', 'Administration', and 'Analytics'. Below this, a breadcrumb trail shows 'Applications' > 'Modules' > 'Extensions' > 'Solutions'. The main heading is 'Module DDOPortal'. Below the heading, there are links for 'Back to Modules List', 'General Log', 'Screen Log', 'Error Log', 'Service Actions Log', and 'Timer Log'. The module details section shows: Application: DDO Portal, Description: Online Portal for DDO, Status: The Module is OK. No messages to show., and Last Published: 07-03-2022 15:33:01 by Cuc Tran. Below this are buttons: 'Redeploy Published Version' (highlighted in red), 'Download Published Version', 'Publish All Consumers', 'Open in Browser', and 'Delete'. A secondary navigation bar includes tabs for 'Versions', 'Dependencies', 'Single Sign-On', 'Solutions', 'Integrations', 'Tenants', 'Site Properties', 'Timers', and 'Operation'. The 'Versions' tab is active, showing a table of module versions with columns for Version, Uploaded, Published, Service Studio Version, and Verified. Each row has 'Publish' and 'Download' buttons. The table lists versions 5012 down to 5007.

Version	Uploaded	Published	Service Studio Version	Verified	
5012	07-03-2022 15:32:12 by Cuc Tran	✓	11.10.19 (Build 41208)	✓	<button>Publish</button> <button>Download</button>
5011	04-03-2022 16:23:25 by Paul Lumpkin		11.11.14 (Build 48084)	✓	<button>Publish</button> <button>Download</button>
5010	28-02-2022 12:04:31 by Joe Bedford		11.14.7 (Build 58100)	✓	<button>Publish</button> <button>Download</button>
5009	25-02-2022 15:32:03 by Joe Bedford		11.14.7 (Build 58100)	✓	<button>Publish</button> <button>Download</button>
5008	25-02-2022 15:12:42 by Joe Bedford		11.14.7 (Build 58100)	✓	<button>Publish</button> <button>Download</button>
5007	25-02-2022 12:02:40 by Joe Bedford		11.14.7 (Build 58100)	✓	<button>Publish</button> <button>Download</button>

- ❖ The basic building block of OutSystems factory is the Application
- ❖ An Application is a group of Modules
- ❖ Code resides within these Modules
- ❖ Modules have controlled versions.

Outsystems – Store

The screenshot displays the OutSystems Forge Store interface. At the top, a dark navigation bar contains the OutSystems Community logo and links to 'My Platform', 'Tools', 'Learn', 'Community', and 'Support'. A search icon and a user profile icon are on the right. Below the navigation bar, the 'Forge' section is highlighted. It includes a description: 'The OutSystems Forge is a repository of reusable, open code modules, connectors, UI components, and business solutions to help speed up app delivery time.' A link to 'Check our FAQs for more information.' and a button to 'Submit an idea!' are present. A 'New asset' button is also visible. To the right, three statistics are shown: '4388 Available assets', '+112 In the last 30 days', and '708 Downloads in the last 7 days'. A search bar with the placeholder 'Search in Forge...' and a 'Search' button are located below the statistics. A link to 'Advanced search' is also present. The 'Featured' section highlights 'OutSystems Maps' by OutSystems, with a 5-star rating and 14 reviews. Below this, three other featured assets are listed: 'Feature Toggle Management' (5 stars, 12 reviews), 'OutSystems.AI Chatbot' (5 stars, 15 reviews), and 'OutSystems Sample Data' (5 stars, 15 reviews). A navigation bar at the bottom lists categories: 'All assets', 'User interface', 'Functional libraries & utilities', 'Apps', 'Demos & samples', 'Integrations', and 'Device capabilities'. The 'All assets' category is selected. Below the navigation bar, the 'Top assets this week' section is displayed, featuring three assets: 'OutSystems UI' (5 stars, 14 reviews), 'Case Management framework' (5 stars, 12 reviews), and 'OutSystems Sample Data' (5 stars, 15 reviews). A 'View all' link is located to the right of the 'Top assets this week' section.

Becoming a Reactive Web Developer

Learn how to build incredible, reactive web experiences. See how to get your data and show it in the screens, providing the user with the best experience while interacting with the application.

📁 20 Courses

🕒 11 Hours

Becoming a Mobile Developer

Learn how to build incredible mobile apps that run on all platforms and offline. You'll learn it all, from front to back-end development and getting them published in the app stores.

📁 26 Courses

🕒 14 Hours

Becoming a Tech Lead

Learn how to design, size and build a functional and technical OutSystems solution based on business needs and drivers. This also includes leading the delivery team, ensuring team work, and controlling progress of the project.

📁 16 Courses

🕒 13 Hours

Becoming a Front-End Developer in OutSystems

Learn how to play the Front-End role while developing mobile apps in OutSystems.

📁 7 Courses

🕒 5 Hours

DevOps in OutSystems

Learn how to plan and setup an OutSystems infrastructure that supports continuous delivery of applications into production. This also includes monitoring infrastructure as well as applications deployed in production.

📁 10 Courses

🕒 10 Hours

Becoming a Tester in OutSystems

Learn how to do testing and ensure the quality of your OutSystems applications. See how you can establish a testing strategy and execute the tests during development iterations and in releases. Explore in detail the implementation and execution of some tests in OutSystems.

📁 9 Courses

🕒 5 Hours

OutSystems for .NET Developers

Learn how the tools and capabilities of the .NET platform map to the tools and capabilities in OutSystems. Everything from creating, packaging, building, running, and debugging applications will be covered.

📁 3 Courses

🕒 3 Hours

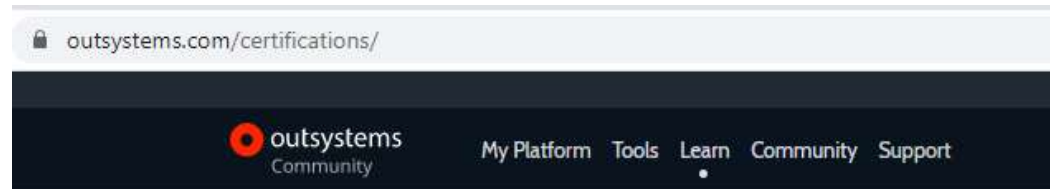

Becoming an OutSystems Business Analyst

Learn all about what is necessary to be a Business Analyst in the context of an OutSystems project.

📁 8 Courses

🕒 5 Hours

Q&A

❖ How long does it take to learn Outsystems

	Less than a week	One week to less than two weeks	Two or more weeks
Solution architects		X	
Developers	X		
Business analysts			X
DBAs	X		

❖ Who can develop with Outsystems

- Just about anyone who understands development can use Outsystems.

❖ How to kick-off

- Go to <https://www.outsystems.com/>
- Click on “Start Free” button and register your account to Outsystems
- Follow the registration process
- Have your own personal development environment and “Service Studio” installed in your desktop.
- Take Outsystems developer online course and enjoy your first app.
